

下載及安裝TI MSP 430 CCS程式的步驟

授課：陳右穎老師

Presenter: TAs

到TI的網站

(直接搜尋TI)

The screenshot shows a Google search interface. The search bar contains the text 'TI'. Below the search bar, the results are displayed. The top result is for 'https://www.ti.com' with the title 'Analog | Embedded processing | Semiconductor company | TI ...'. The description below the title reads: 'Texas Instruments has been making progress possible for decades. We are a global semiconductor company that designs, manufactures, tests and sells analog ...'. A red box highlights this top result. Below the main search results, there is a section for '來自 ti.com 的搜尋結果' (Search results from ti.com) which includes a 'Log in' link and the text 'Buy ICs, tools & software directly from TI. Request samples, enjoy ...'.

Design tools & simulation

Browse our portfolio of diverse selection tools, calculators, simulation tools and model libraries that aid the entire design process

We provide a wide variety of design tools to help you with the design process from selecting the right IC to designing the application bill of materials (BOM), analyzing your design and even exporting the design to CAD tools. To verify your design, we offer a desktop-downloadable TINA-TI simulator, spice models and Cadence PSpice to run electrical simulations. With comprehensive tools such as our WEBENCH™ Power Designer, power for processors, Power Stage Designer™ software tool and Filter Designer, you can perform simulations to help you analyze and understand your design performance.

Code Composer Studio™ software

Whether you need a desktop environment or are looking to start development in the cloud, you have flexibility using the Code Composer Studio Integrated Development Environment (IDE). These solutions are tailored to your needs to help you scale your designs and develop quicker. Use our industry-leading suite of tools used to develop, compile, debug and analyze embedded applications. The choice is yours: design on your desktop or in the cloud. Have confidence knowing you are using proven development tools that support you from investigation through to production.

Code Composer Studio™ desktop IDE

- Based on the Eclipse open source development environment enabling integration with many tools.
- Includes an optimizing C/C++ compiler, source code editor, project build environment, debugger, profiler and many other features.
- Provides a single user interface taking you through each step of the application development flow. Familiar tools and interfaces let you get started faster than ever before.
- Freely available for download without a licensing fee.
